

## **AMENDMENTS TO THE CLAIMS**

The following listing of claims will replace all prior versions and listings of claims in the application.

### **LISTING OF CLAIMS**

1-17. (cancelled)

18. (currently amended) An organic electroluminescent device comprising:  
an organic thin-film transistor including at least an active layer made of an organic material; ~~and~~  
an organic electroluminescent element driven by the organic thin-film transistor; and  
an interlayer-insulating film disposed between the organic thin-film transistor and the luminescent layer; and  
the active layer being disposed between a gate of the organic thin-film transistor and the interlayer-insulating film.

19. (previously amended) The organic electroluminescent device according to Claim 18, further comprising a substrate, wherein the organic electroluminescent element is provided between the substrate and the organic thin-film transistor.

20. (previously amended) The organic electroluminescent device according to Claim 18, further comprising a substrate, wherein the organic thin-film transistor is provided between the substrate and the organic electroluminescent element.

21. (currently amended) The organic electroluminescent device according to Claim 18, ~~wherein, in each pixel, a total area of a source region area and a drain region area of the organic thin-film transistor is~~ being larger than an area of a region provided with a the luminescent material of the organic electroluminescent element layer.

22. (currently amended) The organic electroluminescent device according to Claim 18, ~~wherein the source and the drain, which constitute the organic thin-film transistor, including a source having a first part and a plurality of second parts projecting from the first part and a drain having a third part and a plurality of fourth parts projecting from the third part, have bent parts that face each other at a predetermined spacing.~~

23. (currently amended) The organic electroluminescent device according to Claim 22, ~~wherein a~~ the gate is provided so as to covering at least a part of each of the plurality of second parts and at least a part of each of the plurality of fourth parts. ~~the bent parts of the source and the drain.~~

24. (currently amended) The organic electroluminescent device according to Claim 22, one of the plurality of second parts being sandwiched between two of the plurality of fourth parts. ~~wherein the bent parts of the source and the drain are provided in a comb shape and face each other at a predetermined spacing.~~

25. (currently amended) The organic electroluminescent device according to Claim 22 18, the organic thin-film transistor including a source having a spiral shape and a drain having a spiral shape. ~~wherein the bent parts of the source and the drain are provided in a spiral shape and face each other at a predetermined spacing.~~

26-40. (withdrawn)

41. (currently amended) The organic electroluminescent device according to claim 18, wherein the active layer includes ~~comprises~~ an organic-semiconductor film made of at least one of anthracene, tetracene, and pentacene.

42. (currently amended) The organic electroluminescent device according to claim ~~19~~ 18, wherein the ~~organic electroluminescent element comprises a~~ luminescent layer, ~~the luminescent layer~~ having a cylindrical shape.

43. (previously added) The organic electroluminescent device according to claim 42, wherein the luminescent layer has a thickness of about 80 nm.

44. (currently amended) The organic electroluminescent device according to claim 42, wherein the luminescent layer includes ~~comprises~~ at least one of polyfluorene and polyparaphenylene.

45. (currently amended) The organic electroluminescent device according to claim ~~19~~ 18, further comprising:

~~an a first electrode connected to the organic thin-film transistor and in contact with the luminescent layer; and~~

a second electrode that sandwiches the luminescent layer with the first electrode.  
~~an insulation film provided between the electrode and the substrate.~~

46. (currently amended) The organic electroluminescent device according to claim 45, ~~further comprising:~~

An area occupied by the first electrode is larger than an area occupied by the a  
~~luminescent layer comprised of the organic luminescent element,~~  
~~wherein the electrode is larger than the luminescent layer.~~

47. (currently amended) The organic electroluminescent device according to claim 20 45, ~~further comprising:~~

~~an the first electrode connected to the organic thin film transistor and contacted~~  
~~with a luminescent layer, wherein the electrode has having a cylindrical shape.~~
